

ALICE IN THE CROSSCURRENTS

2024
UPDATE

AN UPDATE ON FINANCIAL HARDSHIP IN IOWA

In 2022, financial hardship in Iowa continued to be shaped by the conflicting economic forces of the pandemic, and remained substantially undercounted by official measures.

These powerful crosscurrents – COVID-19, inflation, wage growth, and the expansion and expiration of [pandemic public assistance](#) – impacted how many Iowa households were below the [ALICE Threshold of Financial Survival](#).

Between 2021 and 2022, the number of households in poverty in Iowa increased by 2,406 (remaining at 11% of all households). The number of ALICE households increased even more substantially, by 21,874 (up to 26% of all households), continuing a more than decade-long trend in the growth of this population. **In 2022, of the 1,307,751 households in Iowa, 483,724 – 37% – were below the ALICE Threshold.**

With the latest data from the [American Community Survey](#) (2022), the [U.S. Census Bureau's Household Pulse Survey](#) (2023), and the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED) (2022), this Update highlights the conflicting forces that continue to present opportunities for, and barriers to, financial stability in Iowa.

Total Households in Iowa = 1.3 Million

KEY TERMS

- **ALICE:** Asset Limited, Income Constrained, Employed – households that earn above the Federal Poverty Level (FPL) but cannot afford the basic cost of living in their county. Despite struggling to make ends meet, ALICE households often do not qualify for public assistance.
- **ALICE Household Survival Budget:** Reflects the minimum costs of household necessities in Iowa (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for different counties and household types
- **ALICE Threshold of Financial Survival:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties
- **Below ALICE Threshold:** Includes households in poverty and ALICE households combined
- **ALICE Essentials Index:** A measure of the average change over time in the costs of essential goods and services

United Ways of Iowa

HOUSEHOLD COSTS, PUBLIC ASSISTANCE, AND WAGES

Financial hardship among Iowa households shifted from 2021 to 2022 based primarily on three factors:

- **Costs:** From 2021 to 2022, the ALICE Household Survival Budget for a single adult in Iowa increased from \$24,192 to \$25,572, well above the FPL of \$13,590. For a family of four with an infant and a preschooler, the budget (including tax credits) increased from \$61,308 to \$73,548, well above the FPL of \$27,750. Excluding tax credits, costs for a family of four totaled \$78,744 in 2022, up from \$75,228 in 2021. (More data on inflation is available in the [ALICE Essentials Index](#) June 2024 Update.)
- **Public assistance:** Pandemic assistance had the most pronounced effects on families with children. The Economic Impact Payments and the expansions of the Child Tax Credit (CTC) and the Child and Dependent Care Tax Credit (CDCTC) helped many ALICE families through 2021. But this assistance was substantially reduced when the [2021 American Rescue Plan](#) expired, stimulus payments ended, and tax credits reverted to 2020 levels. In 2022, a family of four with an infant and a preschooler in Iowa was eligible for approximately \$15,000 less in maximum federal tax credits and stimulus payments than in 2021.
- **Wages:** As pandemic assistance wound down, wages increased for most low-wage jobs. For example, median cashier wages in Iowa increased from \$11.29 per hour in 2021 to \$14.33 per hour in 2022.

Comparison of Costs, Public Assistance, and Wages, Family of Four, Iowa, 2021 and 2022

Note: CTC = Child Tax Credit, CDCTC = Child and Dependent Care Tax Credit. Full-time income is calculated based on 40 hours per week.

Sources: ALICE Threshold, 2021 and 2022; Bureau of Labor Statistics—Occupational Employment Statistics, 2021 and 2022; Internal Revenue Service, tax credits—CTC, CDCTC, EITC, 2021 and 2022; U.S. Department of the Treasury, 2022 and 2023

See page 13 for Household Survival Budget sources and visit UnitedForALICE.org/Household-Budgets/iowa to see the Household Survival Budget for all counties and for any household composition.

Across the country, between 2019 and 2022, [wages for the lowest-paid jobs increased](#) at a faster rate than at any point since 1979. This was in part due to a [tighter labor market](#) in which workers reevaluated their employment situation in the wake of the pandemic and inflation, and employers had to offer more competitive wages to attract and retain them. While minimum wage increases in some states also contributed to this effect, that wasn't the case in Iowa; the state's minimum wage has been \$7.25 since 2010. But overall, low-wage jobs in Iowa still saw notable wage increases from 2019 to 2022.

While these increases helped fill the gap when pandemic assistance ended, they were not enough to make up for years of falling behind. In 2022, of the 20 most common occupations in Iowa as reported by the Bureau of Labor Statistics (BLS), 70% still paid less than \$20 per hour. And of the workers in these 20 most common occupations, 27% were below the ALICE Threshold in 2022. Occupations with the largest share of ALICE workers included personal care aides, cooks, teaching assistants, cashiers, and waiters/waitresses.

Labor Characteristics of Most Common Occupations, Iowa, 2019–2022

Most Common Occupations	Total Employment, 2022 (BLS)	Percent of Workers Below ALICE Threshold, 2022 (ACS PUMS)	Median Hourly Wage, 2022 (BLS)	Percent Change in Wage, 2019–2022 (BLS)
Driver/Sales Workers and Truck Drivers	52,810	25%	\$18.69	3%
Cashiers	47,390	43%	\$14.33	33%
General and Operations Managers	36,100	10%	\$36.69	-7%
Fast Food and Counter Workers	35,810	35%	\$12.48	23%
Registered Nurses	34,050	9%	\$31.25	9%
Retail Salespersons	33,940	25%	\$13.85	20%
Laborers and Movers, Hand	30,780	31%	\$18.34	14%
Customer Service Representatives	29,580	22%	\$18.68	8%
Cooks	27,220	46%	\$14.13	18%
Office Clerks, General	26,380	15%	\$18.29	11%
Stockers and Order Fillers	26,120	30%	\$16.50	20%
Elementary and Middle School Teachers	24,050	8%	\$28.93	11%
Teaching Assistants	23,610	44%	\$17.09	41%
Personal Care Aides	23,010	54%	\$14.92	19%
Nursing Assistants	20,880	40%	\$16.68	17%
Bookkeeping, Accounting, and Auditing Clerks	18,030	13%	\$21.15	13%
Sales Representatives, Wholesale and Manufacturing	17,980	7%	\$37.77	30%
Waiters and Waitresses	15,670	42%	\$10.49	13%
Maintenance and Repair Workers	14,090	20%	\$21.95	10%
Secretaries and Administrative Assistants	13,580	25%	\$19.01	11%

Note: BLS = Bureau of Labor Statistics; ACS PUMS = American Community Survey Public Use Microdata Sample. Occupation titles and percent of workers below the ALICE Threshold come from ACS PUMS. ALICE Threshold status is determined by comparing workers' household income to the Household Survival Budget for their household composition and location. Employment and wage numbers are from BLS and are matched to the closest PUMS occupation title (which are generally broader than those in BLS).

Sources: ALICE Threshold, 2022; Bureau of Labor Statistics—Occupational Employment Statistics, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2019 and 2022

To see the most common occupations for workers below the ALICE Threshold in your community, visit UnitedForALICE.org/ALICE-EVD. For more data on jobs by hourly wages and full-time, part-time, and hourly work schedules, visit UnitedForALICE.org/Labor-Force/Iowa.

Financial Hardship Over Time

Despite some ups and downs in rates of financial hardship since the end of the Great Recession, the trend is clear: **The number of ALICE households in Iowa has been steadily growing.** From 2010 to 2022, the total number of households in the state increased by 7%, households in poverty increased by 3%, and the number of ALICE households increased by 30%. By 2022, 11% (146,833) of all households were below the FPL, and 26% (336,891) of all households were ALICE – a combined 37% (483,724) of households struggling to make ends meet.

households below the ALICE Threshold in 2019 to 36% in 2021 and 37% in 2022.

This consistent trend – a growing number of households that are struggling financially, often ineligible for public assistance, and undercounted by official measures – represents a major vulnerability in our economic system. It also suggests that overall social and economic policies are falling short in addressing the root causes of financial instability.

The rate of hardship in Iowa also increased during the period around the COVID-19 pandemic (2019–2022), from 34% of

Households by Income, Iowa, 2010–2022

Note: The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and Poverty-Level households have been generally increasing, decreasing, or remaining flat. The ALICE trend line is statistically significant at $p < 0.001$; however, the Poverty trend line is not statistically significant, and caution should be used when making predictions.

Sources: ALICE Threshold, 2010–2022; U.S. Census Bureau, American Community Survey, 2010–2022

SPOTLIGHT ON ALICE DEMOGRAPHICS

Families With Children

While recent attention has focused on the rising [Supplemental Poverty Rate](#) for children following the expansion and reversal of Child Tax Credits during and after the pandemic, longer-term trends — specifically, the decline in total families with children and the rise in ALICE households with children — tell a more nuanced story.

The number of households with children in Iowa has declined slightly (down 2% from 2010 to 2022). This trend has been driven by married-parent households, which fell in number from 250,980 in 2010 to 241,441 in 2022 (down 4%), and single-female-headed households, which fell from 75,607 in 2010 to 71,363 in 2022 (down 6%). At the same time, the number of single-male-headed households increased, from 26,173 in 2010 to 32,911 in 2022 (up 26%).

In Iowa, the number of households with children in poverty has been declining over the past decade for both married-parent and single-female-headed families, but increasing for single-male-headed families. Meanwhile, the number of ALICE households with children has increased for all family types. By 2022, 28% of families with children in Iowa were below the ALICE Threshold. And longstanding disparities in financial hardship by household type remained: 72% of single-female-headed families and 51% of single-male-headed families were below the ALICE Threshold in 2022, compared to 12% of married-parent families.

Households With Children, Iowa

	Married-Parent	Single-Female-Headed	Single-Male-Headed
Percent Change 2010 to 2022			
Total Households	▼ Decreased 4%	▼ Decreased 6%	▲ Increased 26%
Households in Poverty	▼ Decreased 30%	▼ Decreased 18%	▲ Increased 61%
ALICE Households	▲ Increased 66%	▲ Increased 27%	▲ Increased 35%
Percent Below ALICE Threshold, 2022	12%	72%	51%

Note: Poverty rates for families with children differ from rates for individual children, in part due to different surveys and in part because there are often multiple children in a single household, which can accentuate swings.

Sources: ALICE Threshold, 2010–2022; U.S. Census Bureau, American Community Survey, 2010–2022

THE COST OF CHILD CARE

Child care remains one of the highest Survival Budget costs for households with children, and the [child care system](#) is still feeling the impact of the COVID-19 pandemic. Provider shortages and lack of affordable care present fewer options for parents. According to the October 2023 Household Pulse Survey, when families in Iowa were asked what they did when child care was closed, unavailable, or unaffordable, the most common responses for respondents below the ALICE Threshold were to cut work hours (33%) or to take unpaid leave (28%).

Households Headed by People Age 65 and Over

With the [aging of the Baby Boomer generation](#), households headed by people age 65 and over are the fastest-growing age group in Iowa (up 25% between 2010 and 2022). They are also the age group with the most substantial increase in the number of households below the ALICE Threshold (up 23% during the same period).

In 2022, 46% of Iowa's 65+ households were below the ALICE Threshold (165,981). While Social Security helps [reduce the poverty rate for households headed by older adults](#) (9% in Iowa in 2022), benefits have not been enough to help bring older adults to financial stability. As a result, for more than a

decade, a substantial number of these households have been ALICE (37% in 2022). In 2022, monthly costs for the ALICE 65+ Survival Budget for one adult in Iowa were \$800 more than the [average Social Security payment](#) and \$1,294 more than the FPL.

With increasing costs and insufficient retirement savings, many older adults have needed to continue working. In 2022, more than 131,200 people age 65 and over living below the ALICE Threshold in Iowa did not have retirement savings beyond Social Security, and more than 18,200 were working.

Monthly ALICE 65+ Survival Budget Total, Average Monthly Social Security Payments, and the Federal Poverty Level, Iowa, 2022

Note: See page 13 for a breakdown of monthly ALICE 65+ Survival Budget costs.

Sources: ALICE 65+ Survival Budget, 2022 (see the ALICE [Methodology](#) for details); Social Security Administration, 2022

Black, Hispanic, and Indigenous Households

Rates of financial hardship differ substantially by race/ethnicity in Iowa due to [persistent systemic racism](#), [discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability. In 2022, 62% of Black, 57% of American Indian/Alaska Native, 50% of Native Hawaiian/Pacific Islander, and 46% of Hispanic households, as well as 46% of households headed by someone of Two or More Races, were below the ALICE Threshold in Iowa, compared to 38% of Asian and 35% of White households. The challenges of the pandemic also disproportionately impacted Black and Hispanic households, especially with regard to health and employment.

- **Health:** According to the Federal Reserve SHED (October 2022), in the [West North Central Census Region](#), 47% of Black respondents below the ALICE Threshold and 43% of Hispanic respondents below the Threshold reported that during the previous year they went without health care (prescription medicine, seeing a doctor, mental health care, or dental care) because they couldn't afford it, compared to 35% of White respondents below the Threshold. With these gaps in care and [greater exposure to risk in on-site essential jobs, rates of infection and death due to COVID-19](#) were higher among American Indian/Alaska Native, Black, and Hispanic people than among White people throughout most of the pandemic.
- **Employment:** Black and Hispanic workers were more likely than White workers to experience [disruption in employment](#) during the pandemic. And gaps in employment persisted: As recently as the fourth quarter of 2023, the [unemployment rate](#) among people age 16+ in Iowa was higher for Black workers (5.6%) and Hispanic workers (4.3%) than for White workers (2.7%).

Household Financial Status and Key Demographics, Iowa, 2022

	Total	Below ALICE Threshold	■ Poverty ■ ALICE ■ Above ALICE Threshold		
ALL HOUSEHOLDS	1,307,751	483,724	11%	26%	63%
AGE					
Under 25 Years	80,749	51,837	33%	31%	36%
25 to 44 Years	418,095	131,584	11%	21%	69%
45 to 64 Years	449,955	134,322	9%	20%	70%
65 Years and Over	358,952	165,981	9%	37%	54%
RACE/ETHNICITY					
American Indian/ Alaska Native	3,272	1,861	14%	43%	43%
Asian	26,180	9,822	11%	26%	62%
Black	41,348	25,512	19%	43%	38%
Hispanic	57,085	26,309	10%	36%	54%
Native Hawaiian/ Pacific Islander	937	464	2%	47%	50%
Two or More Races	37,985	17,493	11%	35%	54%
White	1,146,294	403,855	7%	28%	65%
HOUSEHOLD TYPE					
Married With Children	241,441	28,714	4%	8%	88%
Single-Female- Headed With Children	71,363	51,554	36%	36%	28%
Single-Male-Headed With Children	32,911	16,697	19%	32%	49%
Single or Cohabiting, Under 65, no Children	603,084	220,778	12%	25%	63%
RURAL/URBAN					
Rural	554,249	209,574	11%	27%	62%
Urban	753,502	274,150	11%	25%	64%

Note: The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Update, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Counties are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Counties with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2022; American Community Survey, 2022

ALICE REMAINS IN THE CROSSCURRENTS

Many ALICE households face [ongoing distress](#) because they have not recovered from the Great Recession, debt accumulation, a job loss, or other major challenges. Many are working hard and still struggling to find safe housing, quality child care, nutritious food, accessible health care, and reliable transportation that they can afford. Rising wages and pandemic assistance mitigated some of the financial impact of business disruptions, a health crisis, and rising inflation that characterized the past few years. Yet 37% of households in Iowa were still struggling in 2022 – [ranking](#) Iowa 14th among all states and the District of Columbia in financial hardship (with 1st representing the lowest rate of hardship). Insights from the Federal Reserve SHED and the Household Pulse Survey help explain why:

Inflation is Hitting ALICE Harder

- **The cost of basics** is increasing faster than the overall rate of inflation, as reported by the [ALICE Essentials Index](#). And it has gotten harder for ALICE to keep up with bills than at the height of the pandemic. According to the Household Pulse Survey, 53% of households below the ALICE Threshold in Iowa reported that it was somewhat or very difficult to pay for usual items such as food, rent or mortgage, car payments, and medical expenses in October 2023, up from 46% in August 2020.
- **Housing costs** are on the rise in many parts of the state, and the impact is greater for those who were already struggling financially. According to the SHED, in 2022, 36% of households below the ALICE Threshold in Iowa reported that their rent or mortgage had increased in the prior 12 months (compared to 19% of households above the Threshold).

Changes in Public Assistance Impact ALICE

- **Food assistance:** Increased need for food assistance was a hallmark of the pandemic. Food pantries experienced a substantial increase in [demand for services](#), and Supplemental Nutrition Assistance Program (SNAP) [eligibility criteria broadened and monthly payments increased](#) (through February 2023). In 2022, the need remained high, with one in six Americans (49 million) [receiving private charitable food assistance](#) – down from the height of the pandemic, but still up markedly from 40 million in 2019. In part due to the SNAP income eligibility level in Iowa (160% of the FPL), public food assistance was not accessible to all households that were struggling financially: Only 34% of Iowa households in poverty and 14% of ALICE households participated in SNAP in 2022. Among all eligible people, estimated [SNAP participation rates were higher](#).
- **Rent:** During the pandemic, the Emergency Rental Assistance Program (ERAP) helped [an estimated 17,000 Iowans](#) cover rent and utilities. Yet with rising costs, diminished [emergency rental assistance](#), and the end of both [state](#) and [federal eviction bans](#), many Iowans continued to struggle to pay their rent. According to the Household Pulse Survey, 12% of renter households below the ALICE Threshold in Iowa were still behind on rent payments in October 2023, down from 17% in August 2020. In Iowa in 2022, 65% of households below the ALICE Threshold were rent

burdened (paying more than 30% of their income on rent) and 37% were severely rent burdened (paying more than 50% of their income on rent).

- **Medicaid:** During the pandemic, [Iowa Medicaid services](#) were expanded, and members did not need to submit renewals to maintain continuous coverage. However,

in March 2023, Iowa Medicaid returned to original operations and began disenrolling members. As of [March 2024](#), 174,732 enrollees were disenrolled due to procedural reasons. State officials projected that around [17.6% of current Medicaid](#) members would lose their health care coverage as a result of Medicaid “unwinding.”

ALICE is Less Prepared for Crises and Retirement

- **ALICE saves at lower rates:** According to the SHED, 62% of respondents in Iowa had emergency savings in 2022 (the same rate as in 2019). But the rate was lower for households below the ALICE Threshold: 51% had emergency savings (or rainy day funds) that would cover their expenses for three months in the event of sickness, job loss, economic downturn, or another emergency in 2022, up from 47% in 2019.
- **ALICE faces unexpected medical expenses:** According to the SHED, 11% of respondents below the ALICE Threshold in Iowa incurred an unexpected major medical expense that they had to pay for out of pocket because it was not completely paid for by insurance in 2022, down from 14% in 2021. Medical debt generally reflects [poorer health](#) and lower rates of health care coverage, and can lead to [lower credit scores](#) and [additional financial hardship](#). Additionally, the [consequences of medical debt](#) are not experienced equally; those with lower incomes and people of color are more likely than their counterparts to be contacted by collection agencies and denied future care.
- **Financial hardship impedes retirement savings:** According to the SHED, in 2022, 38% of all non-retired adults and 42% of non-retired adults above the ALICE

Threshold in Iowa reported that their retirement savings plan was currently on track. Yet 31% of those below the Threshold reported the same.

- **Financial hardship takes a toll on mental health:** The negative impact of financial stress on mental health has been [well established](#). According to the Household Pulse Survey, 21% of respondents below the ALICE Threshold in Iowa reported feeling nervous, anxious, or on edge nearly every day over the prior two weeks in October 2023 – down slightly from August 2020 (23%), yet still almost twice as high as for those above the Threshold (11% in 2023).

This research shows a clear trend in our communities and our economy: Financial hardship is widespread, and it’s not going away. The current system is not working for ALICE. The narrative in this Update helps make the case for innovative, cross-sector change in Iowa and across the U.S. The data, tools, and resources on the [United For ALICE](#) website can equip business, government, education, and nonprofit leaders to make data-informed decisions that address the root causes of financial hardship. Collaborative effort at all levels – local, state, and federal – will be needed to change the trajectory for ALICE households.

ALICE RESEARCH & METHODOLOGY

The Household Survival Budget calculates the cost of household essentials for each county in Iowa and relies on a wide range of public data sources, listed below. For household income, the ALICE measures rely on the U.S. Census Bureau’s American Community Survey (ACS) – both household tabulated data and individual data from the Public Use Microdata Sample (PUMS) records. Household costs are compared to household income to determine if households are below the ALICE Threshold.

The latest [ALICE Methodology](#) review was completed in the summer of 2023. Methodology enhancements include:

- Health care costs:** A “poor health multiplier” is used to capture the additional costs lower-income households incur for being in poor or fair health. Based on the latest research, out-of-pocket costs in the health care line item are increased by 19% (a more conservative estimate than the 30% used in prior years).
- Broadband added:** To reflect the finding that the majority of Americans now [have home broadband](#), basic broadband internet has been added to technology costs. The smartphone plan has been updated to include an unlimited (albeit less expensive than the previous 10GB version) smartphone plan for each adult in the household.
- Determining ALICE status:** For 2021 data and years prior, the ALICE Threshold was rounded to the nearest ACS income bracket (e.g., Threshold of \$32,500 corresponded to bracket \$30,000–\$34,999; all households in that bracket were below the ALICE Threshold). Starting this year (2022 data), the Threshold is calculated in proportion to where it falls within the bracket (e.g., if Threshold is \$32,500, half of households in the bracket are below the Threshold).

ALICE Household Survival Budget, Iowa, 2022			
	Single Adult (Age 18–64)	Single Adult (Age 65+)	2 Adults, 1 Infant, 1 Preschooler
Monthly Costs			
Housing – Rent	\$410	\$410	\$492
Housing – Utilities	\$163	\$163	\$310
Child Care	-	-	\$1,122
Food	\$443	\$409	\$1,206
Transportation	\$386	\$322	\$1,036
Health Care	\$196	\$532	\$715
Technology	\$86	\$86	\$116
Miscellaneous	\$168	\$192	\$500
Tax Before Credits	\$279	\$343	\$1,065
Monthly Total	\$2,131	\$2,457	\$6,562
ANNUAL TOTAL Before Tax Credits	\$25,572	\$29,484	\$78,744
Tax Credits (CTC and CDCTC)	\$0	\$0	(\$5,196)
ANNUAL TOTAL With Tax Credits	\$25,572	\$29,484	\$73,548
Full-Time Hourly Wage	\$12.79	\$14.74	\$36.77

Note: CTC = Child Tax Credit, CDCTC = Child and Dependent Care Tax Credit. Full-time hourly wage represents the wage needed at 40 hours per week to support the annual total, with credits. For the family of four, this represents the combined wage needed for two workers. Many households incur higher costs, especially for housing, as units may not be available at Fair Market Rent.

Data Notes: The income data used in this Update rely on ACS estimates. The ACS is based on a representative sample, rather than all housing units and people; therefore, these estimates have a [degree of uncertainty](#). Some data points are geographic averages, others are one- or five-year averages depending on population size (see the [Data Sheet](#) for details). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. ALICE analysis does not include people who are unhoused or living in group quarters.

ABOUT UNITED FOR ALICE AND OUR PARTNERS

ALICE in the Crosscurrents: An Update on Financial Hardship in Iowa is brought to you by [United Ways of Iowa](#) in partnership with [United For ALICE](#), a driver of innovative research and action around financial hardship for ALICE households. With a commitment to [racial and economic justice](#), United For ALICE and United Ways across Iowa share this work with foundations, government, corporations, and other nonprofits to inform policy and promote positive change for ALICE households. The grassroots ALICE movement, developed by United Way of Northern New Jersey, has spread to 31 states and the District of Columbia. Learn more about the ALICE movement [here](#).

To create the ALICE Reports, our [team of researchers](#) works with [Research Advisory Committees](#) composed of experts from our partner states. This work is guided by our rigorous [methodology](#), which is updated biennially with experts from across our Research Advisory Committees.

United For ALICE partners with [United Ways of Iowa](#) to bring this research to Iowa, and this work is sponsored by the GreenState Foundation.

United Ways of Iowa
